# Soba Living Network

The mission of Soba is to provide a safe, transitional, sober environment aiding in establishing a strong foundation in recovery. Soba Living is home to those men and women who already have a basic foundation around their sobriety yet feel they need additional support. This transitional experience will help residents learn life skills, stay on track, and be responsible. Soba Living believes that random urine and breathalyzer testing is necessary to secure a sober living environment for all residents. Soba Living also believes long-term sobriety provides the best chance for a successful transition to a life without being trapped by addiction to drugs and alcohol. That all of us need purpose and productivity for success in life, and that healing of relationships to family and friends is an important part of recovery and long-term success is best attained by those with a sincere commitment to long term sobriety. Available activities include morning meditation, referrals for local outpatient treatment, and available consultation by legal experts.
